Errata - NCSS Report B-4 (CY 68)

Revised tables A, B, and C, and revisions for tables 1-25, as applicable, are attached. For the revisions, two lines of data are given for each relevant item, the first showing how the item reads, and the second how it should read. Changes are given for "Total," "Title XIX States," and "Georgia."

State	Numbers of recipients of medical vendor payments for--			Amounts of medical vendor payments for--		
	Total	Recipients for whom money payments were authorized	Recipients for whom money payments were not authorized	Total	Recipients for whom money payments were authorized	Recipients for whom money payments were not authorized

Numbers of Recipients and Amounts of Medical Vendor Payments
Under Public Assistance Programs
Calendar Year 1968

Highlights

National

A total of 12.5 million persons had medical vendor payments made in their behalf in calendar 1968--an increase of 26 percent over the estimated total of 9.9 million in calendar 1967 (page 2).

Payments totaled \$3.95 billion, with inpatient hospital care and nursing home care accounting for 69 percent of the total. Physicians' services accounted for an additional 11 percent (page 2).

For each 1,000 persons in the total population 65 had payments for one or more types of services (utilization rate). The numbers per 1,000 for specified age groups were: under age 21--73; aged 21-64--42; and aged 65 or over--153 (table A).

An average of \$20.04 was spent for each person in the civilian population (table B).

Sixty percent of all recipients also received money payments; their medical payments represented 52 percent of the total (table 1).

States

Utilization rates (number of recipients per 1,000 population) among States and jurisdictions with title XIX programs ranged from 8 in Guam to 506 in Puerto Rico. In general, rates for States with title XIX programs tended to be considerably higher than for States without such programs (table A).

The average expenditure per person in the civilian population ranged from \$0.91 in Arizona, a State without a title XIX program, to \$65.99 in New York (table B).

The number of recipients ranged from 250 in Alaska to 2,993,000 in New York. Three States, California, Massachusetts, and New York, accounted for 47 percent of all recipients and 55 percent of all payments (table 1).

The average payment per recipient depended largely upon services provided, and ranged widely among States. In general, the average rose with the age of the recipient. (table C).

Total recipients and payments

This report includes State data on the numbers of persons in whose behalf medical vendor payments were made during calendar year 1968 and the amounts of such payments. ^{1/} These data, derived from State reports on Form FS-2082.2, are the first since fiscal year 1965 on the utilization of medical care on an annual basis.

Two States, Colorado and Pennsylvania, did not submit reports, and estimates of totals were made for them. For the country as a whole, including these estimates, the number of recipients with medical vendor payments was 12.5 million, an increase of 2.6 million over the estimated number for calendar year 1967. The estimated distribution of payments by type of service was as follows:

	Amount (000,000)	Percent
Total.....	\$3,950	100.0
Inpatient hospital care.....	1,490	37.7
Nursing home care.....	1,245	31.5
Physicians' services.....	425	10.8
Prescribed drugs.....	285	7.2
Dental services.....	200	5.1
Outpatient hospital services.....	165	4.2
Other practitioners' services.....	40	1.0
Laboratory and radiological services....	25	0.6
Home health services.....	10	0.3
Clinic services	5	0.1
Other.....	60	1.5

Utilization rates and per capita payments

Utilization rates (the numbers of persons receiving medical care per 1,000 persons in a specified population) are not ordinarily computed for a period of less than a year. For calendar year 1968 States were requested to report the number of persons eligible at some time during the year to receive medical care, distributed by basis of eligibility, money payment status, age, race, and sex. Some States were not able to provide complete or valid data. Rates were calculated, therefore, using total civilian population,

^{1/} Relatively minor differences between data included in this report and those in other statistical reports result from:

1. The use of statistical samples for preparing State data on which this report is based.
2. The exclusion from this report of data on general assistance medical payments, premium payments for Part B Medicare benefits, and accounting adjustments.

those aged 65 or over, those under age 21, and the remaining group aged 21-64, as estimated by the Bureau of the Census. These State utilization rates are given in table A. 1/

Utilization rates per 1,000 persons in the total population 2/ for the 52 reporting jurisdictions, by type of service, were as follows:

All services.....	65
Physicians' services	35
Prescribed drugs.....	32
Outpatient hospital services.....	21
Inpatient hospital care.....	11
Dental services	10
Other practitioners' services.....	6
Laboratory and radiological services	4
Nursing home care.....	3
Clinic services.....	1
Home health services.....	*
Other.....	6

* Less than 0.5

Utilization rates may be considered an indicator of the degree to which a medical program is reaching a given population--the higher the rate the greater the proportion of the population receiving care. Another indicator is the per inhabitant expenditure for medical assistance. In general, the higher the per inhabitant expenditure, the more and better the medical care provided. However, the per inhabitant expenditure may also reflect other factors such as (1) the relative need for medical assistance in the State, (2) variations in the local availability of particular medical services, (3) local practices in terms of the use of medical services, and (4), perhaps most importantly, variations in the charges made for particular medical services.

Utilization rates, then, reflect the proportionate numbers of persons receiving medical care, while per inhabitant expenditures serve as a type of index of medical assistance provided.

Table A shows, by State, utilization rates for recipients under age 21, aged 21-64, aged 65 or over, and all ages combined. Table B shows the expenditure per inhabitant for medical vendor payments (per capita payments) for the respective age groups, and Table C shows the average payment per recipient. State rankings are also shown on these tables. The charts cover total utilization rates and per capita payments.

1/ These rates cannot be compared directly with rates computed for 1962-1965, which were based on cases open at some time during the year, by program.

2/ Population as of July 1, 1968, estimated by the Bureau of the Census.

A graphic comparison of utilization rates and per capita expenditures is given in chart 1. The amounts of payments are arranged in descending order of magnitude, and if the magnitude of utilization rates followed the same order their representative bars would form a pattern similar to that for expenditures. In general this tends to be the case. ^{1/} The most noticeable deviations are, of course, Puerto Rico and the Virgin Islands. The high utilization rates for these two jurisdictions are probably accounted for both by economic conditions and by the fact that prior to the initiation of the medicaid program, medical care was provided from public funds to all those who wished to receive it. Thus, use of facilities would be an established practice among all those who need medical care. The average payment per recipient of medical care, all recipients, is lower for Puerto Rico and the Virgin Islands than for any other State or jurisdiction. Expenditures for some services reportedly are not included, however, because of the fixed limitation on Federal financial participation.

The complex way in which per inhabitant expenditures relate to utilization rates and average payments, by age group, is illustrated by the following data for California.

	Under Age <u>21</u>	Aged <u>21-64</u>
Recipients per 1,000 population.....	114	80
Average payment per recipient of care.....	\$104.53	\$411.06
Expenditures per inhabitant.....	\$ 11.87	\$ 33.03
Number of recipients	865,000	768,000

It is observed that for California:

1. The utilization rate (recipients per 1,000 population) for recipients aged 21-64 is considerably less than that for recipients under age 21.
2. The average payment per recipient of care in the older age group is nearly four times that in the younger age group.
3. The per inhabitant expenditure for the population aged 21-64 is almost three times that for the population under age 21.

^{1/} Excluding the two nonreporting States, Colorado, and Pennsylvania, and the three jurisdictions, Guam, Puerto Rico, and the Virgin Islands, data for the other 48 States and the District of Columbia showed a coefficient of correlation of +.897 for these two variables.

These differences occurred despite the fact that under a State's title XIX program the same types of care, except nursing home care 1/, must be made available to all recipients regardless of their age. There are differences among the States, however, in the types of care provided to recipients.

Charts 2 and 3 show the geographic distribution of utilization rates and expenditures per inhabitant for medical care. Generally, States with the highest utilization rates, 67 or more per 1,000 population, have programs that cover groups of people and types of medical services that are optional under a title XIX program. Of the 10 States (excluding Guam) with the lowest utilization rates, 1 to 22 per 1,000 population, 6 are in the South and 7 did not have medicaid programs. Most of these ten States have relatively low per capita incomes and, historically, they have been slow in initiating public assistance medical programs. Only one State (South Carolina) had started a program of Medical Assistance for the Aged, MAA, by January 1, 1962 (the legislation was effective October 1, 1960), whereas seven of the eight States having the highest utilization rates (excluding Puerto Rico and the Virgin Islands) 2/ started such programs by that date.

States having the greatest expenditure per inhabitant for medical assistance, more than \$19, were concentrated in the Northeast and North Central regions and those with the lowest expenditure, less than \$5, were concentrated in the South. For these two groups of States the per inhabitant expenditure patterns for medical care for calendar year 1968 and public assistance money payments (all programs combined) in fiscal year 1968 were somewhat similar. For example, five of the States with high medical amounts had money payments above the national average, but all of the States in the group with the lowest medical amounts had money payments that were less than the national average.

In general, the average payment per recipient of care rose with the age of the recipient. This is largely a reflection of the cost variation in type of care provided. For recipients under 21 years of age payments for hospitalization and nursing home care represented 42 percent of total medical amounts for the group, compared with 82 percent of the paralleling amount for recipients aged 65 or over.

1/ The requirement for skilled nursing home services is limited to individuals 21 years of age or older.

2/ Puerto Rico and the Virgin Islands started their MAA programs on October 1, 1960, and January 1, 1961, respectively.

Among States, the average for all recipients ranged from \$33.48 in Puerto Rico, where less than a third of the payments were for hospital services, to \$3,724.00 in Alaska, where all payments were for nursing home care of a relatively few recipients aged 65 or over. Only three other States, Alabama, Arizona, and Nebraska, had average payments of more than \$500. Alabama and Arizona did not have title XIX programs and their payments were limited almost exclusively to institutional care. Nebraska's title XIX program covered all the reported types of medical services, but payments were largely concentrated under institutional services.

BEHALF, PER 1,000 TOTAL CIVILIAN RESIDENT POPULATION, 1968 \downarrow

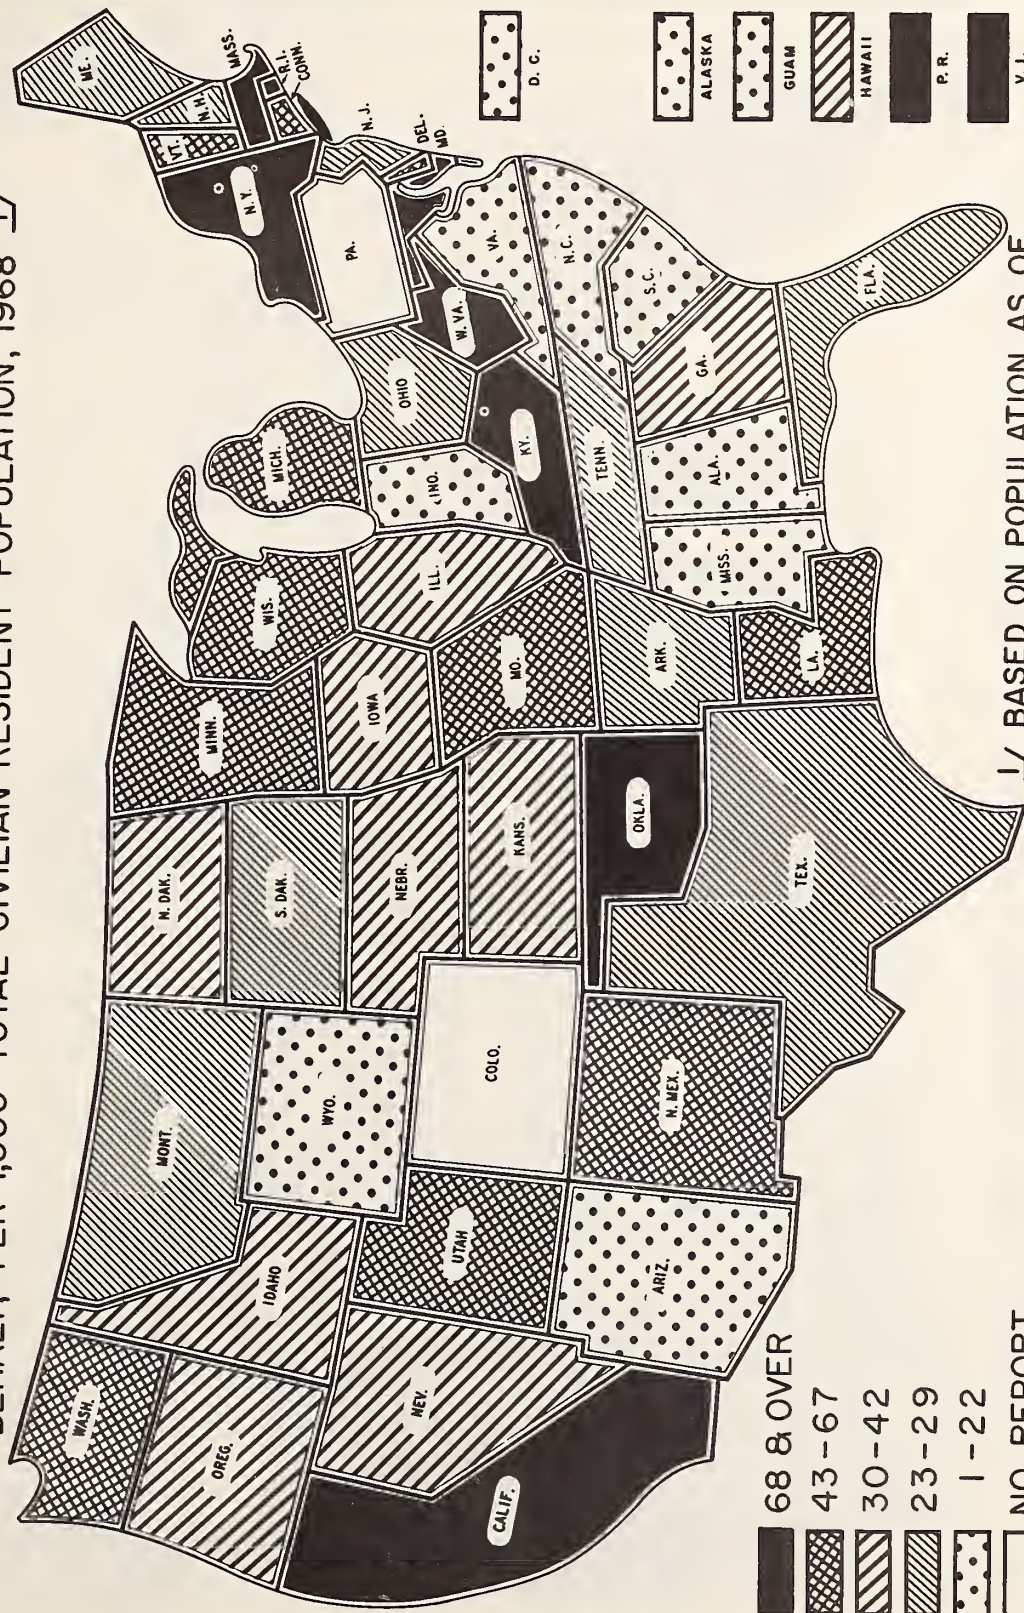

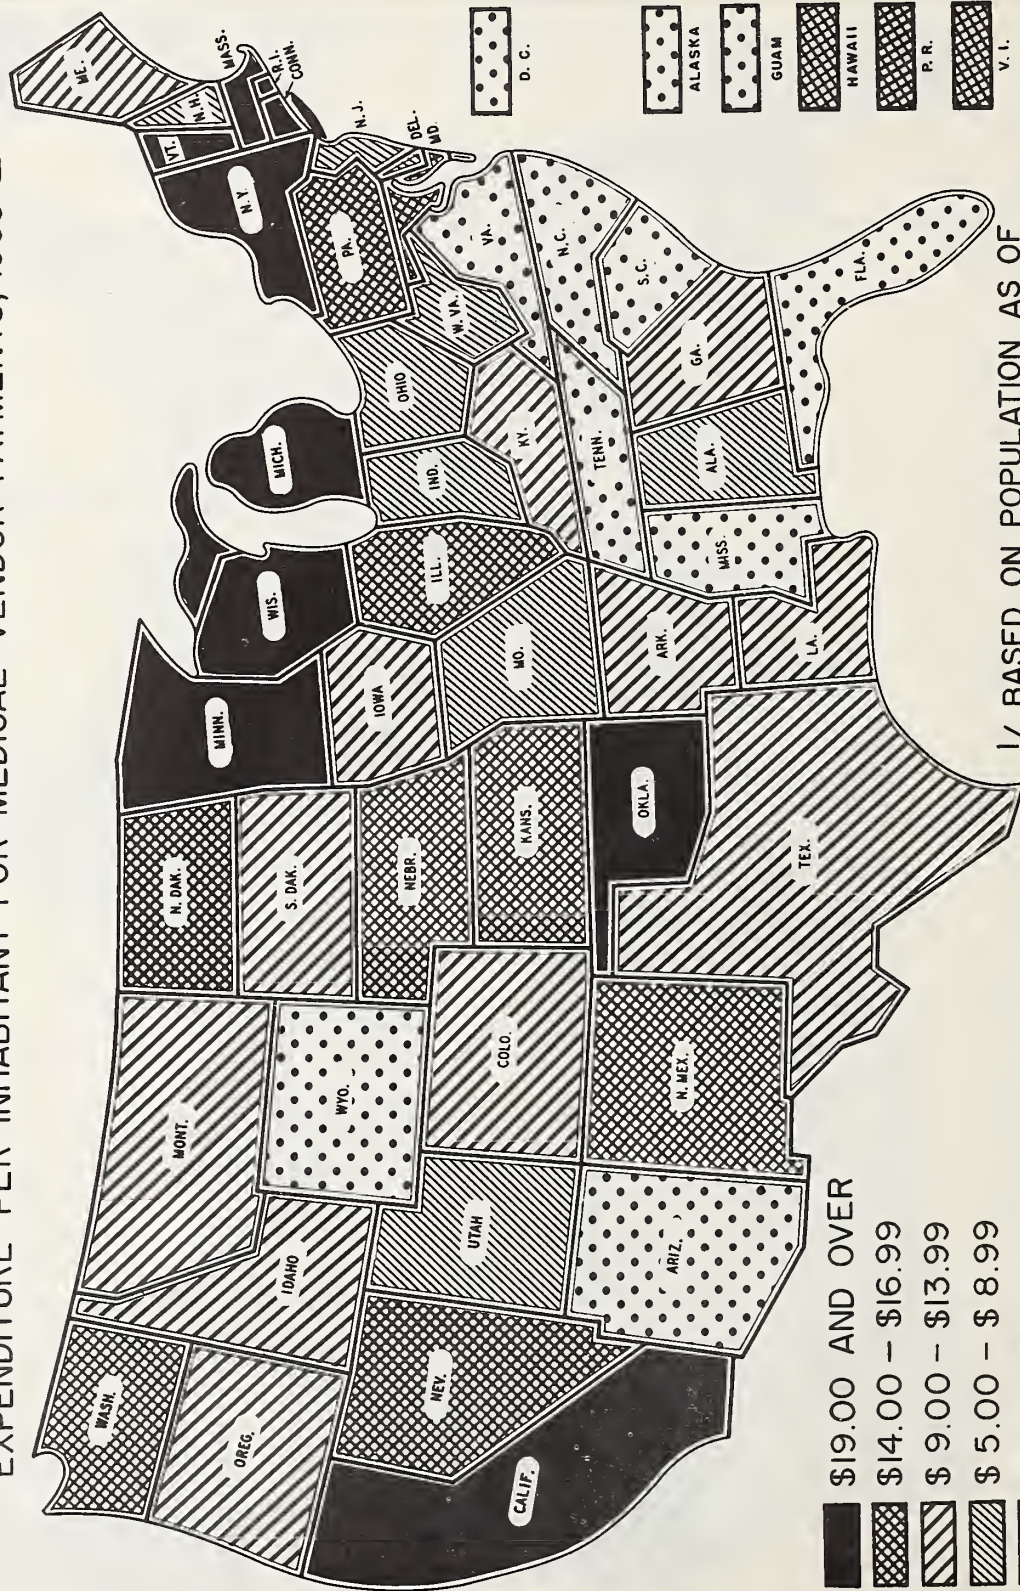

CHART 3.

EXPENDITURE PER INHABITANT FOR MEDICAL VENDOR PAYMENTS, 1968 ↘

↘ BASED ON POPULATION AS OF JULY 1, 1968, ESTIMATED BY BUREAU OF THE CENSUS.

Interpretations and definitions

In the following tables the numbers of different recipients represent the unduplicated totals of persons for whom medical vendor payments for one or more types of care were made during the period. In most instances the sum of the numbers receiving the different types of care exceeds the unduplicated total because some recipients received more than one type of care.

States that did not make medical vendor payments under a program and States that made such payments but did not report the specified types of data are footnoted in the various tables.

Components may not add to totals because of independent rounding.

Table 26 shows, for States preparing their reports on a sampling basis, the size of sample used and the sampling percentage represented.

Abbreviated definitions of the types of services for which data are reported are:

Inpatient hospital services - All items of care furnished to an inpatient and covered by the hospital's bill.

General hospital - A hospital maintained primarily for inpatient care of acute illness or injury and for obstetrics.

Mental hospital - A hospital primarily engaged in providing psychiatric services for the diagnosis and treatment of mentally ill persons.

Tuberculosis hospital - A hospital primarily engaged in providing medical services for the diagnosis and treatment of tuberculosis.

Nursing home services - All services furnished to inpatients of, and billed for by, a licensed or formally approved nursing home.

Skilled nursing home or extended care facility - A licensed or formally approved facility that meets specified conditions relating to the supervision of medical care by a physician, adequacy and quality of nursing services, and the like.

Other nursing home - A licensed or formally approved facility which provides nursing home services that do not meet the standards prescribed for a skilled nursing home or extended care facility.

Physicians' services - Services provided by an individual licensed under State law to practice medicine or osteopathy. Services covered by hospital bills are not included.

Dental services - Services, including ancillary services, provided by a dentist in the practice of his profession.

Other practitioners' services - Services of licensed practitioners other than physicians and dentists.

Outpatient hospital services - Services furnished to outpatients by a hospital.

Clinic services - Services furnished to outpatients by a facility which is not part of a hospital, but which is organized and operated to provide services to outpatients.

Laboratory and radiological services - Professional and technical laboratory and radiological services provided in an office or similar facility (other than a hospital outpatient department or clinic) or by a qualified laboratory.

Home health services - Services furnished a patient in his home, including: intermittent or part-time nursing services provided by a home health agency, or by a registered professional nurse or licensed practical nurse; medical supplies, equipment, and appliances for use in the home; and services of a home health aid.

Prescribed drugs - Drugs dispensed by a licensed pharmacist on the prescription of a practitioner licensed by law to administer such drugs, and drugs dispensed by a licensed practitioner to his own patients. This item does not include a practitioner's drug charges that are not separable from his other charges, or drugs covered by a hospital's bill.

Other care - Any medical or remedial care not covered by the above.

1/ Totals do not include data for Colorado and Pennsylvania.

2/ Total includes \$390,000 paid to organized outpatient clinics and \$2,423,000 paid for hospital retroactive adjustments in Oklahoma, not reported by type of service.

3/ Data not reported.

4/ Detail incomplete; data combined for one or more types of services.

5/ Includes only drugs administered directly by a physician where charges are ascertainable from other charges of the practitioner.

6/ Includes \$5,672,000 paid for nursing care in an home.

7/ Data not included in payments of \$7,777,000 for recipients in institutions for the mentally retarded.

8/ Data not included in payments of \$7,777,000 for recipients in institutions for the mentally retarded.

9/ Includes payments for residents of medical care in State colonies for the mentally retarded.

10/ Skilled nursing home care included with other nursing home care.

1/ Totals do not include data for Colorado and Pennsylvania.

2/ Data not reported.

3/ Detail incomplete; data combined for one or more types of services.

4/ Includes only drugs administered directly by a physician whose charges are separable from other charges of the practitioner.

5/ Includes nursing care in own home.

6/ Includes nursing care in own home.

7/ Skilled nursing home care included with other nursing home care.

8/ Detail and other practitioners' services provided children in foster care, but no cases fall in sample.

1/ Totals do not include data for Colorado and Pennsylvania.

2/ Data not reported.

3/ Detail incomplete; data combined for one or more types of services.

4/ Includes only drugs administered directly by a physician where charges are separable from other charges of the practitioner.

5/ Includes recipients of medical care in colonies for the mentally retarded.

6/ Data cover only 11 months, February-December 1968.

7/ Includes recipients of medical care in colonies for the mentally retarded.

8/ Skilled nursing home care included with other nursing home care.

Table 10.—Recipients aged 65 or over, by type of vendor providing care and by State, calendar year 1968

State	Total	Hospital services				Nursing home services				Physicians' services	Dental services	Other practitioners' services	Outpatient hospital services	Clinic services	Laboratory and radio-logical services	Home health services	Pre-scribed drugs	Other care
		Total	In general hospital		In mental hospital	In tuberculosis hospital	Total	In skilled nursing home or extended care facility	In other nursing home

1/ Details do not include data for Colorado and Pennsylvania.

2/ Data not reported.

3/ Detail incomplete; data combined for one or more types of services.

4/ Includes only drugs administered directly by a physician where charges are separable from other charges of the practitioner.

5/ Includes nursing care in own home.

6/ Data cover only 11 months, February-December 1968.

7/ Skilled nursing home care included with other nursing home care.

1/ Totals do not include data for Colorado and Pennsylvania.

2/ Data not reported.

3/ Detail incomplete; data combined for one or more type of services.

4/ Includes only drugs administered directly by a physician where charges are separable from other charges of the practitioner.

5/ Data cover only 11 months, February-December 1968.

6/ Includes recipients of medical care in colonies for the mentally retarded.

Table 14.--Adult recipients in families with dependent children, by type of vendor providing care and by State, calendar year 1968

1/ Totals do not include data for Colorado and Pennsylvania.

2/ Data not reported.

3/ Data combined for one or more types of services.

4/ Includes only drugs administered directly by a physician where charges are separable from other charges of the practitioner.

5/ Includes nursing care in own home.

6/ Data cover only 11 months, February-December 1968.

7/ Includes payments for recipients of medical care in colonies for the mentally retarded.

8/ Skilled nursing home care included with other nursing home care.

Table 21.—Payments for blind recipients, by type of vendor providing care and by State, calendar year 1968

Other States

1/ Totals do not include data for Colorado and Pennsylvania.
 2/ Data not reported.
 3/ Detail incomplete; data combined for one or more types of services.
 4/ Includes only drugs administered directly by a physician where charges are separable from other charges of the practitioner.
 5/ Includes nursing care in own home.
 6/ Data cover only 11 months, February-December 1968.

150,973

Table 22.—Payments for permanently and totally disabled recipients, by type of vendor providing care and by State, calendar year 1968

State	Hospital services				Nursing home services			Physicians' services	Dental services	Other practitioners' services	Out-patient hospital services	Clinic services	Laboratory and radio-logical services	Home health services	Prescribed drugs	Other care	
	Total	In general hospital	In mental hospital	In tuberculosis hospital	Total	In skilled nursing home or extended facility	In other nursing home

1/ Totals do not include data for Colorado and Pennsylvania.

2/ Data not reported.

3/ Detail incomplete; data combined for one or more types of services.

4/ Includes only drugs administered directly by a physician where charges are separable from other charges of the practitioner.

5/ Includes nurseries where charges are combined with other services.

6/ Includes nurseries where charges are combined with other services.

7/ Includes expenditures for recipients of medical care in colonies for the mentally retarded.
